Proposal

Extension of the Village Networks fixed wireless broadband network to the private residences at Liscombe Park.

Stage 1: connection via an existing node in Wing, delivering c.10Mbps download, 0.5Mbps up, unlimited allowance, £30 pcm inc VAT

Stage 2: connection via a new node at All Saints Church, Wing, delivering superfast Broadband (up to 24Mbps), 2Mbps upload, unlimited allowance, for £30 pcm inc VAT.

Technology

We had originally envisaged a single aerial located on a high point of the courtyard structures, connected via a switch and internal/external cabling to the individual properties.

Site visits and discussions with residents have rendered this the least favoured option. The nature of the roof structures is unhelpful for internal cabling, and the view is that external cabling could be unsightly.

As an alternative solution, we propose wireless links to each property from a single node. There is no measurable difference in connection speed or quality over such short distances, and the cost of time taken to build cabled connections would be balanced by the cost of individual aerials at each property.

Costs and opportunities for savings

The standard charge for installing, connecting and configuring an individual connection is £185 exc. VAT. The cost includes all hardware necessary for a single Ethernet connection at a property. A wireless router can be provided, for £75 exc. VAT.

There is no reason why we could not approach the project as a series of individual installations, each commissioned as and when by separate subscribers, and charged at the normal rates.

However, there are clearly savings to be made by connecting a number of subscribers in one operation, and we're happy to pass those savings on to those who participate

If we can connect four subscribers in one operation, we'd be happy to reduce the £185 to £145.

If we can connect six or more subscribers in one operation, we can reduce the charge to £125.

If we can connect ten or more subscribers in one operation, we can reduce the charge to £100.

I look forward to meeting you and your neighbours on Monday evening.
