Hi Ian,

Hope you've been keeping well!

Please see attached the invoice relating to the meter readings you send a few weeks ago.

I held this back whilst waiting for the rest of the residential meter readings to come in so that all invoices could be sent out at the same time for ease.

The exact rate we are charged by the water retailer is £2.82 per m3 of usage. The standing charge is divided evenly between the 57 different tenants on site and apportioned evenly for one quarter.

Do let me know if you have any questions.

All the best,

Fergus

Water tariff applied to the Liscombe Park supply

Hi Fergus, thanks for your email.

We hope you can help us clarify the water tariff currently being applied to the Liscombe Park supply.

With the invoice you sent us, you advised that the current water rate charged for the Liscombe Park supply is £2.82 per cubic metre. This appears to correspond to Anglian Water's Streamline Green tariff for annual consumption of up to 500 m³. Could you please confirm whether this is correct?

The 14 Courtyard properties alone used 213.76 m³ during the recent two-month billing period. At that level of consumption, even allowing for lower usage during the winter, our annual consumption alone would exceed the 500 m³ threshold for Streamline Green.

In addition, there is the water consumption from the other residential properties and businesses on the site, which we expect will considerably exceed that of our 14 properties.

Could you please check whether the correct tariff is being applied and let us know your findings? It appears that the supply may fall within the Streamline Orange or possibly the Profile tariff, both of which carry a lower cost per cubic metre.

We are keen to ensure that we have understood the charging arrangements correctly and would appreciate your help in clarifying this.

Kind Regards

irw Ian R. Woodland
