Subject: Courtyard Management Company and Water Recharging

CMC - The Courtyard Management Company (Rock Lane Farm) Ltd

Dear Fergus,

Thank you for your letter dated 15 May, which we received today.

I would like to clarify a few points and outline how we propose to work with you on behalf of the 14 residences at The Courtyard.

The Courtyard Management Company (CMC) has a mandate from its members, most recently reaffirmed at our May AGM, to represent residents in matters relating to water billing and charges. As such, we would ask that all correspondence regarding water charges is directed through the CMC.

Firstly, could you please confirm our understanding of your letter regarding historic unbilled water charges? We believe you are advising that no charges will be raised for water consumption relating to previous periods that has not already been billed. If this is correct, we would be grateful if you could confirm this in writing.

We would also like to propose continuing the arrangement that was previously in place with the former owners of Liscombe Park. Under this arrangement, the CMC would take and record meter readings for all 14 residences each quarter and provide you with a schedule showing both the current and previous readings, together with the calculated consumption for the period.

You would then issue a single bill to the CMC showing the charges attributable to each residence. The CMC would settle the invoice in full and subsequently recover the relevant amounts from individual residents. We believe this arrangement is beneficial to you, as it provides a single point of contact and avoids the need to administer 14 separate customer accounts. In effect, the CMC would act as a single customer for billing and administrative purposes.

We have already taken meter readings for Quarter 2, although slightly later than the start of the quarter. We intend to take the next set of readings on or around 1 July 2026 and will then be able to provide both sets of readings together with the consumption figures for the quarter. A sample of our current reporting format is attached below. If it would assist your administration, we would be happy to provide the information in either CSV or Excel format.

To ensure that charges are calculated correctly and in accordance with the Water Resale Order and OFWAT guidance, we would ask that any billing information provided to the CMC includes:

- The total standing charge for the billing period.
- The number of properties/purchasers over which the standing charge has been apportioned for the period.
- The unit rate charged per cubic metre of water consumed for the period.

For clarity, the Water Resale Order and OFWAT guidance require that:

- A reseller must not make a profit from the resale of water.
- Water consumption must be charged at the same rate per cubic metre as charged by the supplying water company.
- Standing charges must be apportioned fairly between purchasers.
- Purchasers are entitled to receive a clear explanation of how charges have been calculated.

The administration charge that would be applied to the CMC is £2.50 per quarter. This is within the maximum administration charge permitted under OFWAT guidance for metered accounts.

The information requested above will allow us to verify that charges have been calculated correctly before they are apportioned to individual residents.

We would be grateful if you could confirm that you are happy with the proposed quarterly billing arrangement. We would also appreciate confirmation that you do not intend to seek recovery of water charges for any periods prior to June 2026 where no bill was issued at the time.

We look forward to hearing from you.

CMC THE COURTYARD

Water Meter Readings
